NOTES:
1. Customer
Adding customer must have confirmation
Need fliter FIFO not alphabetical
when adding new customer dapat di makakalagay dun ng number sa name at sa address naman may maximum or if ever na wala naman dapat di sosobra dun sa container ng program

2. Order Type & Items

Sa may ui side naman bakit para saan pa raw ung +ADD eh kung ung entire section pwede na pindutin para mag add and whats the point pa raw nung +ADD sa gilid ng entire section na yan.

Sa ordering naman dapat may maximum na naka indicate na agad dito di dun sa may payment & receipt pa makikita ung problem

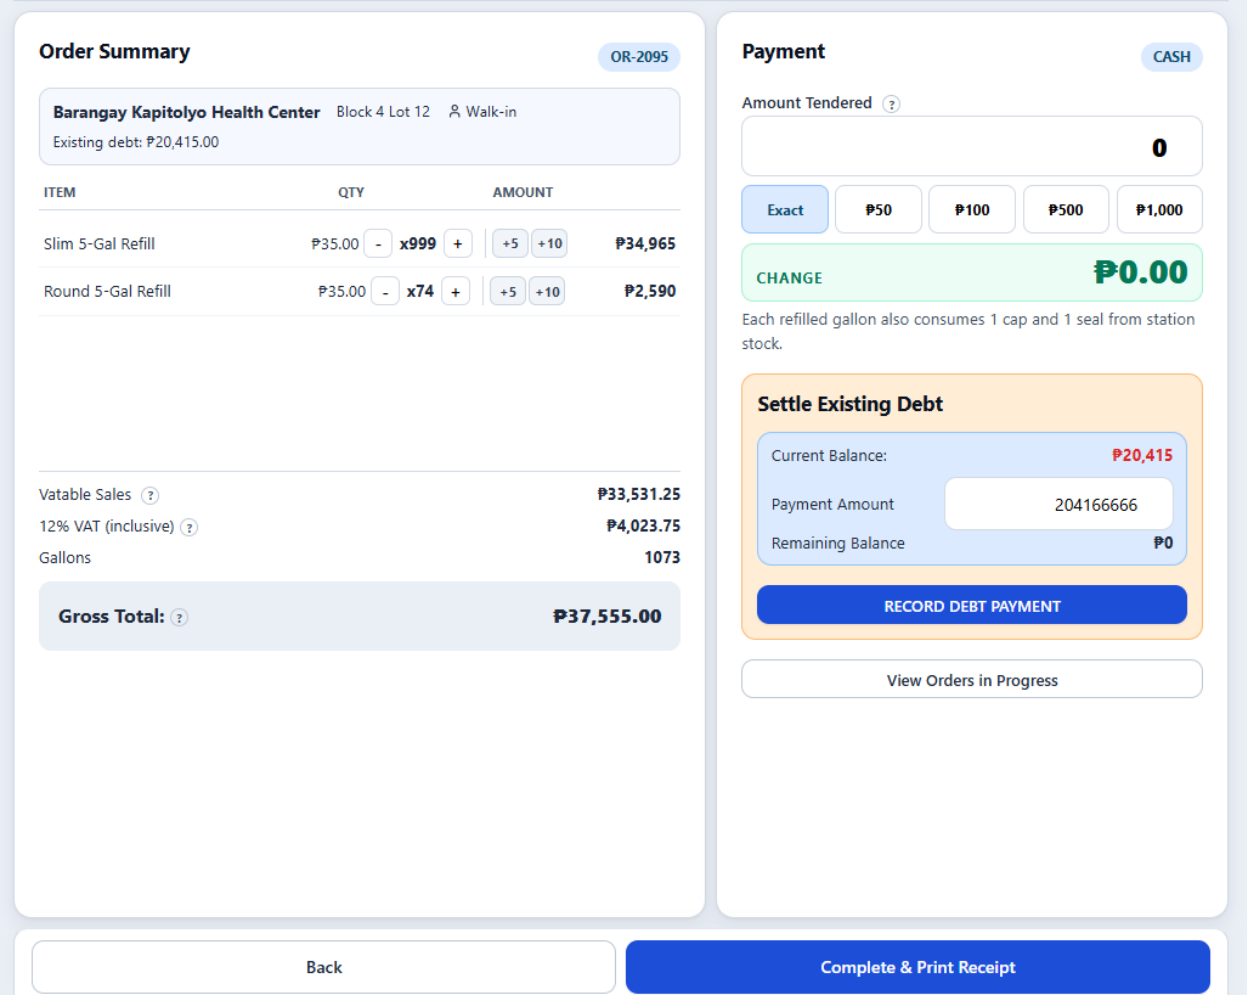

Tapos dun naman sa delivery option sabi sakin (“bakit di pwede mag order ng bagong gallon through calls eh pano kung gusto ko mag pa deliver tapos tatawagan ko lang kayo”) Tapos sabi pa sakin ung order items dapat nag rereflect agad yan na may error agad kasi di na nga kasya ung available stocks nyo dun sa inventory.

3. payment and receipt

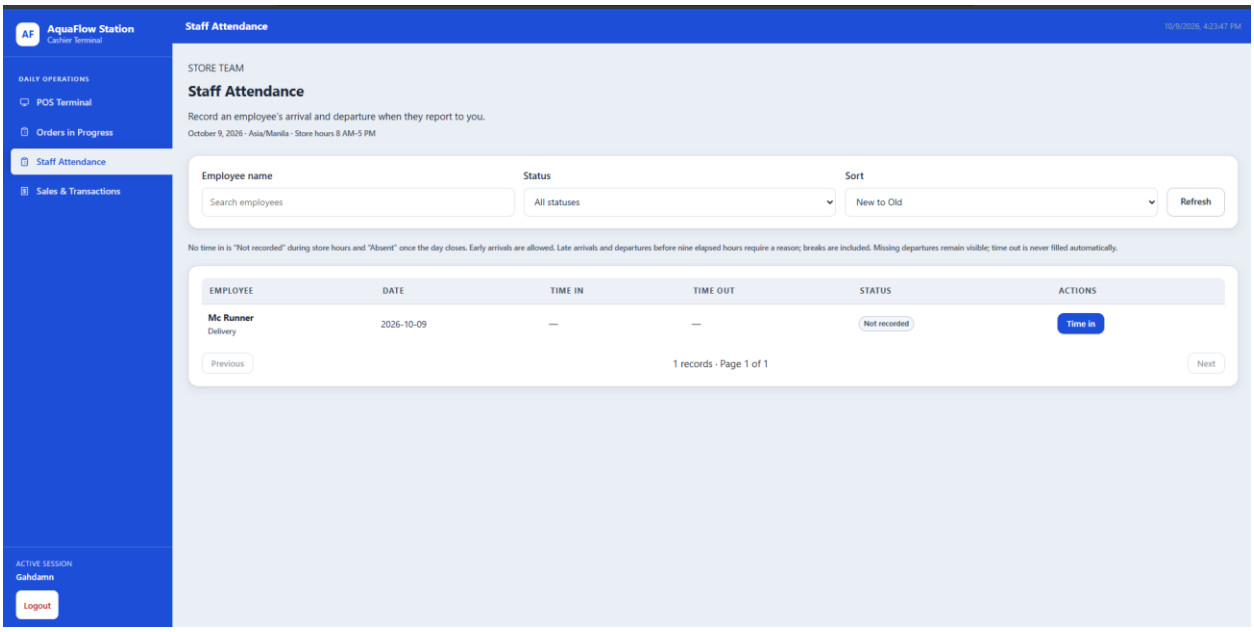

Bakit nag pepersist parin ung ibang order eh dapat pag nagpalit na ng customer dapat di na ung order ng iba ung makikita

Tapos at the same time bakit raw my view order in progress? Eh order ko lang naman un bakit pa need ko makita ung order ng ibang tao?

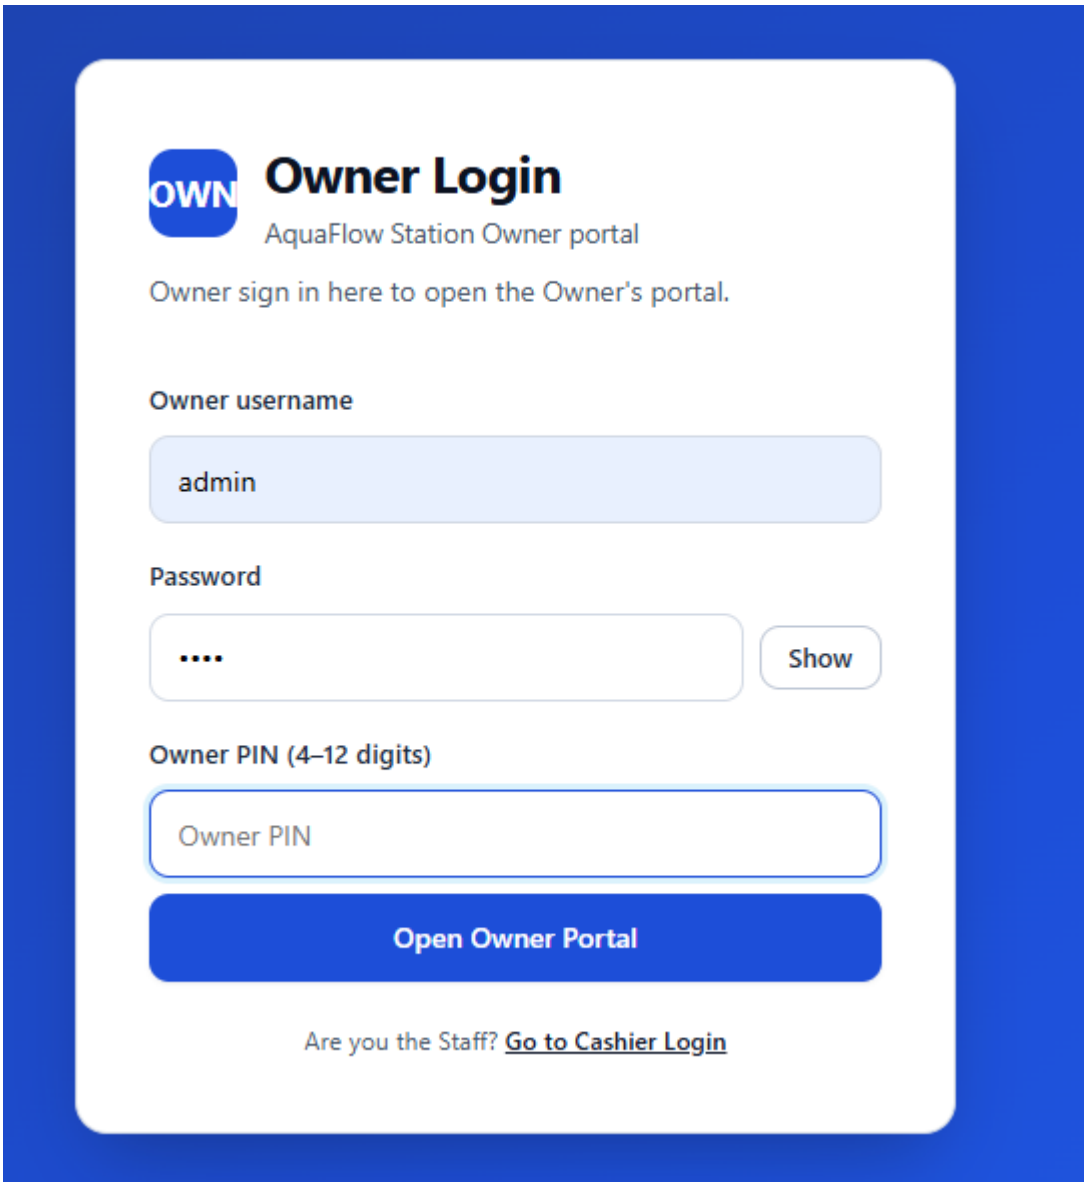

Tsaka bakit sumobra sa settle existing debt ung ibabayad eh dapat may maximum lang yan na payment amount na according lang dun sa current balance

Staff attendance

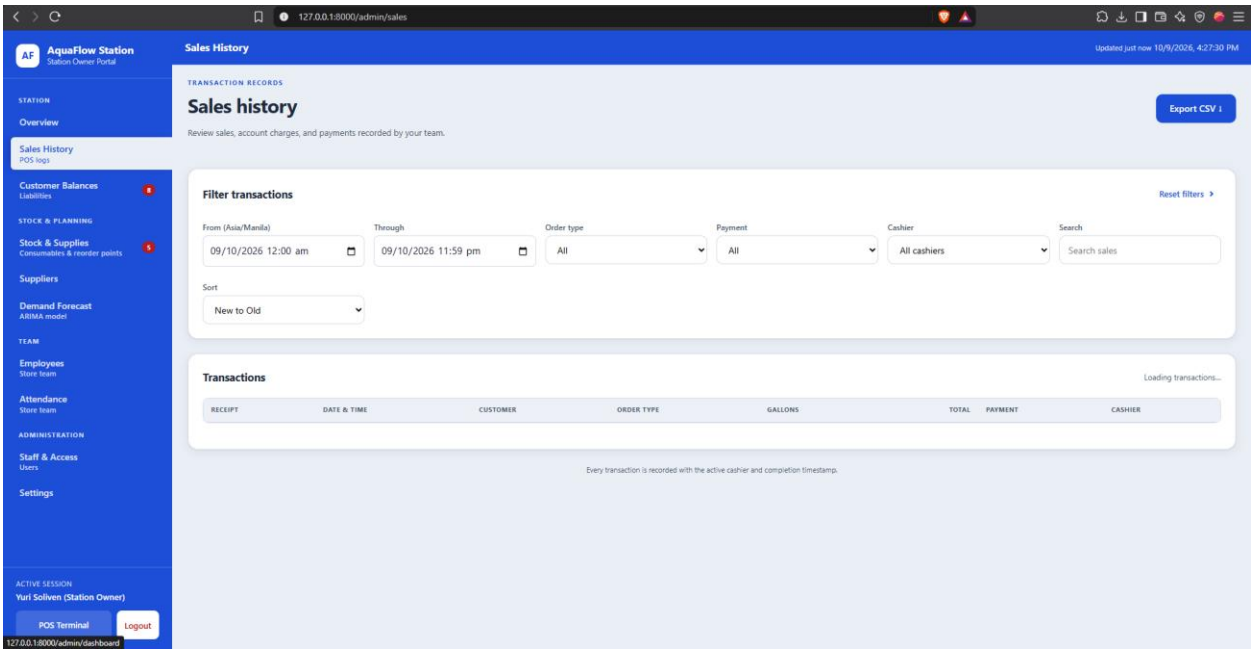

Eh pano naman to bakit raw nasa cashier side tong staff attendance?
ang suggestion nya dapat separated tong dalawang to (argument nya “eh pano kung magkaaway kaming dalawa? Edi di ko na sya lagyan ng attendance diba kupal?”)
tsaka bakit ung cashier raw nakakakita nun either dapat may separate sila na POS for that purpose or dapat si admin lang ung makita tapos maka log then (argument ng kuya ko “Eh kung ganun naman pala bakit pa ako nagpagawa eh di na automate tapos ako pa mag lalagay ng attendance nyan di ba pwede na sya na mismo mag lagay tapos mag reflect nalang dun sa attendance sheet?”)

Owner login

Sabi nya ano na ung SMS nyo nasaan na di ba one time pin lang yan tsaka dapat di pwede hardcoded yan pano pag na compromise ung pin? Dapat gawin nyo na sesend through SMS or gmail nya ung pin before he can log in.

Dashboard UI

Sabi ng kuya ko (“Ayusin nyo ung mga words parang tanga kasi di makita ng maayos although yes responsive sya pero at the same time di parin makita and usually ung gagamit nyan matatanda na edi potcha wala rin kwenta”)
tapos sabi naman nung pinsan ko (“Dapat ung stocks nyo nag rereflect na agad dun sa cashier side nyo para maayos tapos di na dun sa dulo ng receipt makikita ung errors dapat may fact checker na agad kayo dun”)

tapos last suggestion nya dapat di na ung browser mag show ng error dapat meron kayong notification na sya mismo mag sasabi ng error dun mismo nalang sa website nyo ung error kasi pinapakita dito is ung browser ung say ng error which is pangit makita.

Walk-In | Delivery

Delivery orders are charged to the customer account. Brand-new jugs are hidden (walk-in only).
